

13 April 1962

MEMORANDUM FOR THE RECORD

SUBJECT: H. R. 9981

Talked with Karl Weber indicating that if I attempted to look into this matter on the Hill in accordance with his memorandum of 9 April 1962, I felt there could be definite security problems. Therefore, it was suggested that he attempt to get some information on this from our contacts with the Coast and Geodetic Survey or possibly talk with the appropriate Air Force contacts to see if they have any particular knowledge or views on this. In the meantime, we will watch this bill to see if any action is proposed or taken and we can determine appropriate steps at that time.

  
JOHN S. WARNER
